

Free 'Medicines Use in Care Homes' Training

PrescQIPP eLearning

We are delighted to announce that we are able to offer all care homes in the BSW area the opportunity to undertake the 'Medicines use in Care Homes' training programme.

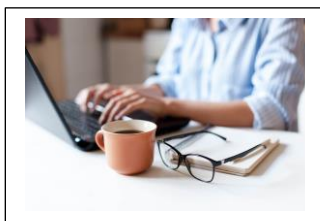

The online training is split into three courses and covers 20 different medicines related topics, such as administration of different types of medicines, covert administration, homely remedies and managing controlled drugs. The course compliments your existing medicines training, and the full course content can be found on the next page.

You can pick and mix the topics that apply to you. Alternatively, if you complete all the topics in a course, you will be awarded a certificate.

Each course will take between 2-3 hours to complete but it is recommended to break the training down into small sections rather than finishing it in one sitting.

The training is **free** to all care home staff!

The training is offered by PrescQIPP, a Skills for Care endorsed provider of e-learning for the adult social care sector. The courses are CPD accredited and carry endorsement statements from NICE.

PrescQIPP

Course content
