

Shared TPP Searches Created By Medicines Management – Where To Find And How To Use

In order to support practices to identify patients, Medicines Management will provide shared searches for use by all Wiltshire practices using SystmOne TPP.

These searches will be updated regularly and new searches will be published in the monthly newsletter. They can be found in the relevant 3 folders entitled:

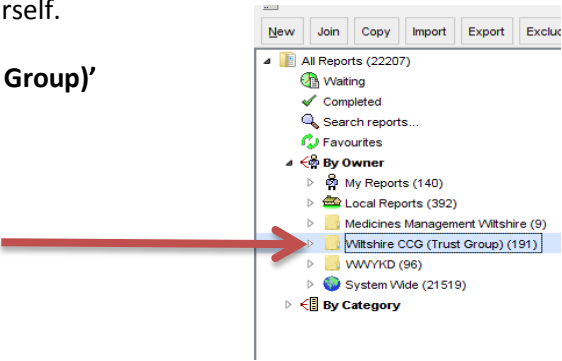

- Prescribing Quality 2016
- Prescribing Safety 2016
- Prescribing Savings 2016

1. With TPP open, go to 'Reporting' (along top bar) and then select:

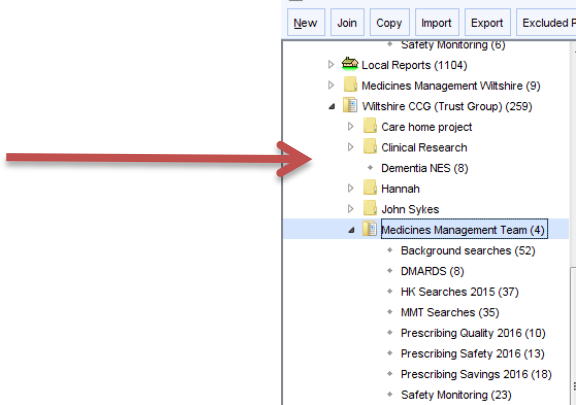

2. On the left hand side of the screen, a list of report folders will be visible. The list will depend on your practice and also how many reports you run yourself.

Scroll down the list to find 'Wiltshire CCG (Trust Group)'

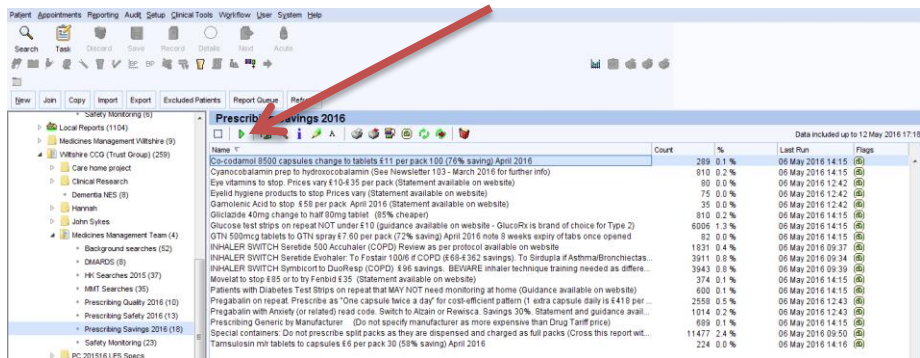

3. Click on the arrow to the left of the folder.

And select 'Medicines Management Team'.

4. Click on 'Prescribing Safety 2016' – this will show a list of searches on the right hand side of the page.

Shared TPP Searches Created By Medicines Management – Where To Find And How To Use

As these searches are already set up, to find your practice’s patients in these lists, all you need to do is select the search you want, and click the green arrow above the list to run it.

This will generate a list of patients for all the drugs in the category. When the search has been completed, it will show with a ‘tick’ and a date on the right hand side:

Name	Count	%	Last Run	Flags
Co-codamol 8500 capsules change to tablets £11 per pack 100 (76% saving) April 2016	289	0.1 %	06 May 2016 14:15	Ⓜ

5. To break down the results and show each drug separately, once the search has been complete, select the search you want (so it is highlighted in blue) and select the ‘breakdown results’ icon

6. This brings up a new screen on the left hand side:

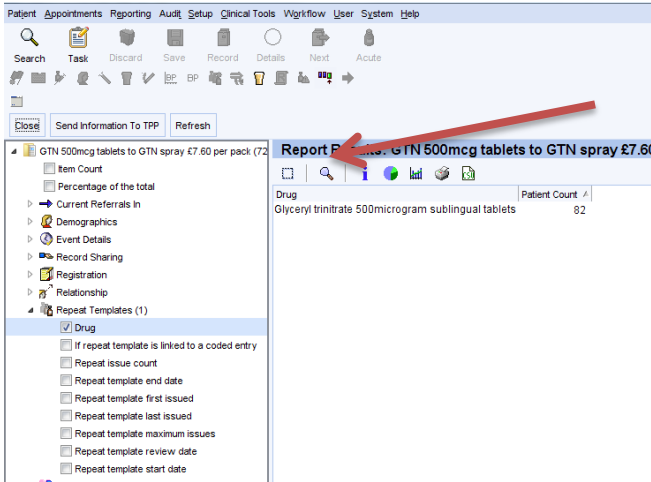

7. If you would like to view the patients by drug, select the arrow to the left of ‘Repeat Template’, then tick the box that says ‘Drug’

- Demographics
- Event Details
- Issues
 - Drug
 - Drug ID
 - Issue duration
 - Issue end date
 - Issue start date
 - Medication type
 - Repeat drug
- Record Sharing
- Registration
- Relationship
- Risk Factors
- Strategic Reporting ID

8. Press the ‘Refresh’ button above the white boxes

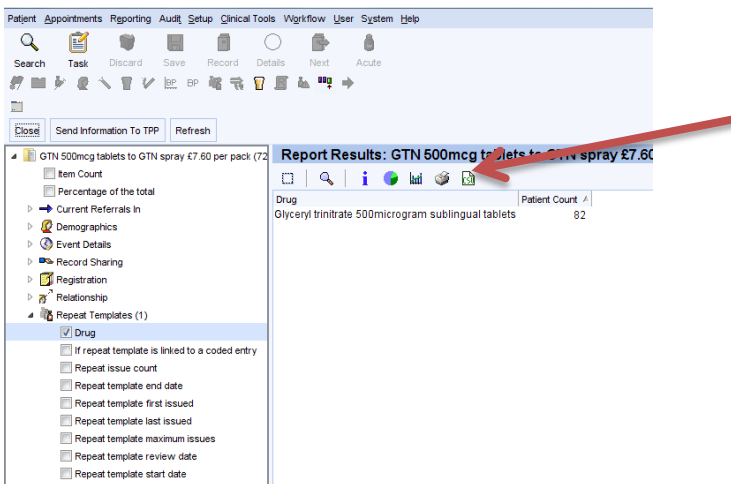

Shared TPP Searches Created By Medicines Management – Where To Find And How To Use

9. This will then list the drugs and the number of patients in each category on the right hand side of the page. In order to view these patients, select the ‘search’ icon (magnifying glass).

10. If you do not select a specific drug when you select the ‘search’ icon, it will show the whole list of patients with the drug on the left hand side of the page. By clicking on the top of the ‘drug’ column, this will sort the list by drug. Alternatively you can sort by any other category (e.g. surname or age).

11. If you want to print this list or manipulate this list, when the list is displayed, Click CSV icon and it will export to Excel.

12. Once you have finished with a specific search, to get back to the search menu, select ‘Close’ on the top left of the page.

For further instructions, please go to the ‘Help’ pages on TPP, or if these searches do NOT work, or are incorrect, please contact the Medicines Management Team at prescribing.wiltshire@nhs.net
